

Yasha Kuruvilla

Business Analyst

EXPERIENCE

Software Engineering TA | BrainStation

AUG 2022 - NOV 2022, LONDON, UK

- Conducted code review for ~20 students on multiple React projects
- Graded assignments and provided personalised feedback on progress
- Provided 1-on-1 mentorship for students

Business Analyst | Zego

JUN 2021 - APR 2022, LONDON, UK

- Spearheaded the rebuild of Zego's B2B insurance web application enabling faster development of new features and improving scalability.
- Liaised with internal stakeholders to ensure new features were prioritised correctly.
- Conducted sprint reviews to keep stakeholders abreast of new releases.

Associate Analyst / Analyst (Insurance) | GlobalData

DEC 2018 - JUN 2021, LONDON, UK

- Built interactive Tableau dashboards allowing clients to gain strategic insights into their markets.
- Designed and deployed a B2B survey of over 2,000 UK SMEs which formed the foundation of over 10 reports.
- Implemented new models to improve the accuracy of survey results by over 50%.
- Delivered live online webinars to over 50 clients to highlight key insurance developments during COVID-19.

Finance Associate | Management Systems International

JUN 2018 - SEP 2018, ARLINGTON, VA, USA

- Collaborated with a team of over 50 project managers with the budgeting of multimillion-dollar United States Agency for International Development (USAID) projects.
- Produced financial reports to optimise project profitability by monitoring costs and projecting cash flow.

PROJECTS

Watchdle -A Wordle styled game based on Overwatch 2

- Full stack app built with NextJS utilising MongoDB, and deployed with Vercel

Asteroids -An arcade style game based on Atari's Asteroids

- Built using Vanilla JS

PROFILE

Insurance analyst with experience identifying problems and trends through data. I am shifting into the software engineering field to build the solutions to those problems. My previous experience within a product team will ensure that I always fall in love with the problem, not the solution.

SKILLS

Amplitude, APIs, CSS, DOM APIs, Enzyme, Express.js, Git, GitHub, Heroku, HTML, JavaScript, Jest, Jira, Kanban, MongoDB, Mongoose, MySQL, NextJS, React.js Scrum, Socket.IO, Tableau Tailwind, Typescript, User Authentication, Vercel, WebPack
